1. Claims 1-17 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record disclose or teach a bandgap reference:

Claims 1 and 13, with a first variable resistor including a first resistor and a plurality of second resistors, wherein each of the second resistors is adapted to be selectively combined in parallel with the first resistor such that a conductance of the first variable resistor equals a sum of a conductance for the first resistor and a combined conductance for the selected second resistors, and wherein the second voltage is inversely proportional to the resistance of the first variable resistor and

Claim 10, with a first variable resistor including a first resistor and a plurality of second resistors, wherein each of the second resistors is adapted to be selectively coupled in parallel with the first resistor such that the resistance of first variable resistor is discrete increments depending upon whether a given second resistor is selected to be coupled in parallel with the first resistor, and wherein a contribution from a voltage component having a positive-to-absolute-temperature (PTAT) temperature dependency to an output voltage of the bandgap reference is inversely proportional to the resistance of the first variable resistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
